

Technical Support - Complimentary and Premium Services

a) Complimentary Services

Our customers receive technical advice from our expert support staff related to the following:

- Logistics involved with bridge installations, road construction and maintenance
- Bridge superstructure span selection and hydrology advice
- MNRF/DFO approvals process advice
- Assistance with developing project budgets

*The above services are **free of charge** to our customers.*

b) Premium Services

In addition to the services identified above, Lessard Welding offers the following premium services to our valued customers on a fee for service basis:

- Field training related to visual inspections of bridges and inventory management
- Road maintenance and construction training
- Engineering and project management services
- Approvals process – obtaining MNRF/DFO approvals (as part of overall Project Management)

*Detailed information on **premium services** offered by Lessard Welding is available upon request*
